# Specifications

---

## General characteristics

The CLH air-to-water reverse cycle heat pumps have been designed to operate with the **HFC 407C** refrigerant.

They are complete with **two independent reversible refrigerant circuits** fitted with a high efficiency and low vibration level Scroll compressor on each circuit.

These units are suitable for outdoor installation on the roof of a building or on the ground.

All the CLH units are completely factory tested in compliance with the internal quality system specifications and procedures, and are ready for field installation.

The "Plug and Play" concept has been introduced in each CLH unit, thanks to the use of BMS compatible microprocessor-based control system and to the **integrated hydraulic module** supplied as optional on all versions of the CLH range.

Also, thanks to the versions and options available, the CLH air-to-water heat pumps can fit all the demands of the market.

The CLH range is available in **4 versions**; each version is composed of **9 sizes**.

**CLH STD : Standard version** fitted with standard equipment intended for reliable operation. The CLH STD units cover a nominal cooling capacity range from 41 to 131 kW and a nominal heating capacity range from 46 to 152 kW.

**CLH LN : Low noise version** having same equipment as STD version, except that it is fitted with low speed type larger size fans. The CLH LN units cover a nominal cooling capacity range from 41 to 131 kW and a nominal heating capacity range from 46 to 152 kW.

**CLH ELN : Extra low noise version** fitted with greater heat exchange surface area condenser coils, very low speed type fans and a stepless fan speed controller. When the optional integrated hydraulic module is supplied with electric heaters (EH), the fan speed controller will be provided upon request, as optional, for external mounting to the unit. Furthermore, the ELN version is equipped with a reinforced soundproofing :

- mufflers mounted on compressor discharge lines (all sizes),
- soundproofing jacket on compressor (sizes 182 to 302),
- sound insulation on compressor compartment (sizes 352 to 602).

The CLH ELN units cover a nominal cooling capacity range from 41 to 131 kW and a nominal heating capacity range from 40 to 152 kW.

**CLH HPF : High pressure fan version** having same equipment as STD version, except that larger size fans with 80 Pa external static pressure are fitted on this HPF version. The CLH HPF units cover a nominal cooling capacity range from 41 to 131 kW and a nominal heating capacity range from 40 to 152 kW.

## Reference standards

The following applies to all the sizes and versions belonging to the CLH units :

- ✓ Performance test EN 12055
- ✓ Machine Directive CEE 89 / 392
- ✓ Low Voltage Directive CEE 73/23 (EN 60204-1)
- ✓ Electromagnetic Compatibility Directive CEE 89/336 as modified by Directive CEE 92/31 (EN 50081-1, EN 50082-2)

## Cabinet and structure

The unit structure shall be of heavy gauge galvanized steel fastened with non-corrosive screws and bolts. Galvanized steel parts shall be painted with baked on enamel colored white (**RAL 9001**).

## Compressors

Each unit shall be equipped with 2 Scroll hermetic compressors.

Compressors on all models shall be mounted on rubber anti-vibration pads and have direct on line starting.

The compressor motors shall be refrigerant gas cooled, with integral thermistor protection against overloads. The overload protection is automatically reset.

The motor terminal boxes shall have IP-54 weather protection.

## Evaporator

Evaporators are of a brazed stainless steel plate type heat exchanger. They are insulated with a closed cell foam material and are fitted with an electric cable resistance to prevent the unit from freezing at a low temperature when the unit is off.

Design working pressure shall be 10 bar on the water side and 30 bar on the refrigerant side.

Water connections are of a 2 " Victaulic type on each evaporator. Optional inlet and outlet 2" male threaded gas type manifolds can be supplied to ensure single flow and return water connections.

## Condenser coils

The condenser coils shall be seamless copper tubes, arranged in staggered rows, mechanically expanded into corrugated aluminum fins.

## Condenser coil fans

The condenser fans shall be direct drive with aluminum wing contour blades. Each fan will have a painted galvanized steel protection guard.

The totally enclosed fan motors shall have IP 54 degree of protection and thermo-contact protection embedded in their windings.

## Fan controls

Each unit can be equipped, as optional , with a stepless fan speed controller, operating on the basis of condensing pressure, to keep fan rpm under control in order to operate in cooling mode at a low ambient temperature (-18 °C).

This fan speed controller is supplied as standard on the ELN units without extra electric heating resistances (EH) and as optional on ELN units with EH resistances. However, it is not available on HPF units.

## Refrigerant circuits

All the units are composed of two independent and separate refrigerant circuits. All the components that constitute each circuit are shown on the functional diagram (see chapter "Refrigerant flow diagram").

## Integrated hydraulic module (optional)

Units can be supplied with optional integrated hydraulic module composed of water tank and 1 or 2 pumps complete with accessories.

Antifreeze heater is supplied as standard in the tank.

The hydraulic module can be fitted, as optional, with an extra electric heating (EH).

Units can also be supplied with pump kit only (with 1 or 2 pumps).

# Specifications (continued)

## Power and control panel

The control compartment shall contain an electronic circuit board and a key control panel with display of operating parameters, alarms and stops.

Thermal relays and fuses are supplied to protect compressors, fans and pumps from overloading.

## Control and safety devices

Each CLH unit is fitted with the following devices :

### Safety :

- ✓ Fan thermal protection.
- ✓ Compressor thermal protection.
- ✓ Water differential pressure switch.
- ✓ High pressure switch.
- ✓ Evaporator antifreeze protection.
- ✓ Low pressure switch.
- ✓ Crankcase heater.

### Control :

- ✓ Evaporator water inlet temperature sensor.
- ✓ Evaporator water outlet temperature sensor.
- ✓ Coil temperature sensor.

## Factory-installed accessories and options

- ✓ Coils with hydrophilic coated fins.
- ✓ Coils with vinyl coated fins.
- ✓ Coils with polyurethane coated fins.
- ✓ Copper / Copper coils.
- ✓ LP & HP manometers.
- ✓ Condenser coil guards.
- ✓ Integrated hydraulic module with water tank, antifreeze resistance and 1 or 2 pumps.
- ✓ Extra electric heating for hydraulic module.
- ✓ Pump kit with 1 or 2 pumps.
- ✓ Compressor overload protection kit.
- ✓ Inlet and outlet water connection manifolds.
- ✓ Phase monitor.
- ✓ Stepless fan speed controller (STD and LN versions).

## Field-installed accessories

- ✓ Water filter.
- ✓ Flow switch.
- ✓ Spring anti-vibration mounts.
- ✓ Remote control kit (On/Off, Heating, Cooling).
- ✓ Modbus interface kit.
- ✓ Remote keyboard panel.
- ✓ Chiller sequencer (4 units maximum).

# Control

Controller display panel

The controller provides information on status of operation, configuration and alarms through a display and LEDs on the front panel.

### Display

It allows mainly to show :

- the entering water temperature of the unit in tenths of degrees Celsius with a decimal point,
- the alarm code if at least one alarm is active.

### LEDs

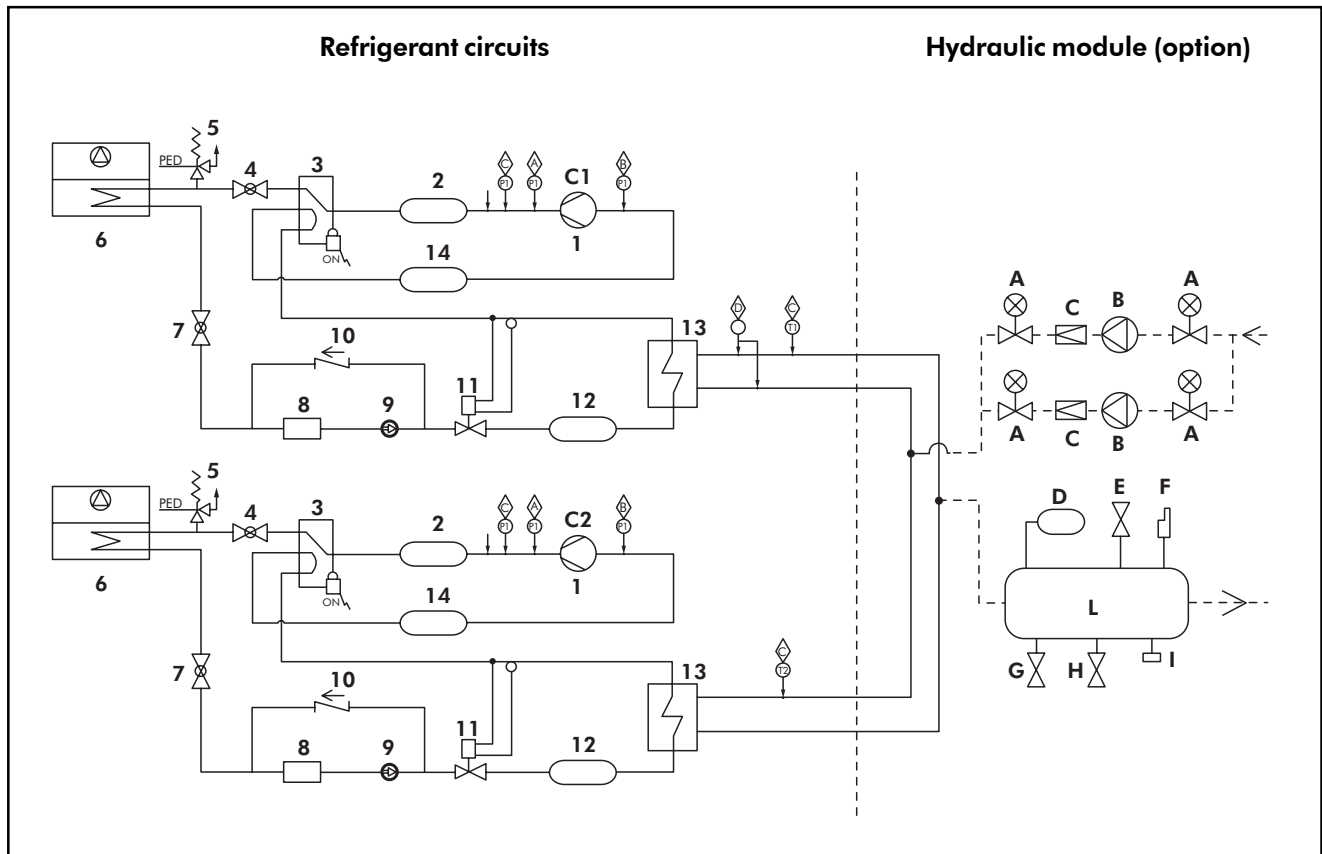

- |                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                           |

|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

If neither HEATING LED nor COOLING LED is ON, the controller is in STANDBY mode.

Remote control kit (optional)

# Refrigerant Flow Diagram

## Components (refrigerant circuits) :

- 1 - Compressors C1, C2
- 2 - Mufflers (for ELN version only)
- 3 - Four-way valve
- 4 - Discharge valve
- 5 - PED pressure relief valve
- 6 - Air cooled condenser
- 7 - Liquid valve
- 8 - Filter drier
- 9 - Sight glass
- 10 - Check valve
- 11 - Expansion valve
- 12 - Liquid receiver
- 13 - Plate heat exchanger
- 14 - Suction accumulator

## Components (optional hydraulic module) :

- A - Shutoff valve
- B - Pump(s)
- C - Check valve
- D - Expansion tank
- E - Relief valve
- F - Air vent
- G - Filling up valve
- H - Drain valve
- I - Manometer
- L - Water tank

## Safety / Control devices :

- ⬆ - High pressure switch
- ⬆ - Low pressure switch
- ⬆ - Transducer (optional)
- ⬆ - Water differential pressure switch
- ⬆ - Pressure tapping and refrigerant charging/discharging points

# Operating Limits

## CLH 182 to 302

CLH			182		202		242		302	
			Min.	Max.	Min.	Max.	Min.	Max.	Min.	Max.
Chiller	Liquid outlet temperature	Water °C	+6 to +15							
		Brine (for low liquid temp. application) °C	-8 to +5							
		Temperature difference K	3 to 7							
	Flow rate l/h	3902	9106	6731	15705	8268	19296	9656	22532	
	Max. operating pressure - Water side bar	10								
Ambient air	Air entering temperature	Cooling - STD °C	15	46	15	46	15	46	15	46
		Cooling - LN/HPF °C	15	46	15	46	15	46	15	46
		Cooling - ELN °C	-18	42	-18	42	-18	42	-18	42
		Heating °C	-5 to +15 °C							
	External static pressure	Standard fans Pa	0							
		High pressure fans - HPF version Pa	80							
Heat pump °C	+30 to +50									
Recommended system chilled water volume litres	200	280	330	370						
Nominal supply voltage	400 V / 3 Ph / 50 Hz									

## CLH 352 to 602

CLH			352		402		502		552		602	
			Min.	Max.	Min.	Max.	Min.	Max.	Min.	Max.	Min.	Max.
Chiller	Liquid outlet temperature	Water °C	+6 to +15									
		Brine (for low liquid temp. application) °C	-8 to +5									
		Temperature difference K	3 to 7									
	Flow rate l/h	10800	25198	12126	28294	13563	31648	12997	37668	14126	37668	
	Max. operating pressure - Water side bar	10

# Dimensions (continued)

## Models CLH 242 ELN and CLH 302 to 602 STD/LN/ELN/HPF

Models	Versions	Dimensions A (mm)	Dimensions B (mm)	Dimensions C (mm)	Number of fans
CLH 242	ELN	2406	2760	1850	3
CLH 302	Standard	2406	2760	1750	3
	LN/HPF	2406	2760	1850	3
CLH 352 to 602	ELN	2406	2760	1850	3
	Standard	2756	3110	1750	3
	LN/HPF	2756	3110	1850	3
	ELN	2756	3110	1850	3

**Note :** For units without hydraulic module, the water connections are done on the optional 2" male threaded gas type manifolds located inside the unit.

# Space Requirements

## Single unit applications

## Multi units applications
